# Removing temporary road markings doesn't have to be a grind.

Help maintain safety in work zones with easy-to-remove 3M™ Stamark™ Removable Tapes.

Temporary pavement markings are crucial to keep traffic moving and help protect workers during work zone construction projects, but they can be time consuming to remove when projects are complete. 3M™ Stamark™ Wet Retroreflective Removable Tape Series 710IR has the same bright reflectivity and excellent performance in all weather conditions that you're used to with our 3M™ Stamark™ Removable Tape Series 710, but now with higher internal strength. This helps make it easier to remove intact, reducing the need for grinding or other destructive methods—saving time and the number of workers on the road.

**Great visibility during projects—easier removal when they're finished.**

Removes at up to

**3  
MPH**

Streamline your road construction projects with removable tapes that reduce the need for grinding, sparing your roads from unsightly scarring. They're easy to see rain or shine, day or night—and easy to apply and remove by hand or machine.

### **3M™ Stamark™ Wet Retroreflective Removable Tape Series 710IR**

Help protect drivers and workers in construction zones with temporary markings that perform like permanent all weather pavement markings—and remove more efficiently than ever.

- ▶ Ideal for longer duration projects
- ▶ Higher internal strength for more intact removal; reduces the need for grinding
- ▶ Exceptional durability—3M premium all weather optics ensure long-lasting durability
- ▶ Fast and easy to apply and remove
- ▶ Available in white and yellow
- ▶ Superior adhesion and conformability—adheres to a wide range of road surfaces
